Subject: RE: December 2012 monthly NHOU progress report

Kelly and Larry,

Recall that last month, MWH, on behalf of Honeywell, sent EPA a document titled "Hydrogeologic Review in the Vicinity of the Hewitt Pit Landfill". I recall that EPA agreed to review and comment on this document. As you conduct that review, please consider that statement in the Monthly NHOU Progress Report regarding well 4909F. **Vulcan** intends to replace that well, and given the information provide in the above mentioned hydrogeologic review, it may be more appropriate for the replacement well to be a nested well pair so that constituents of concern are not missed due to migration below Depth Zone 1/A-Zone. Also, we believe that additional wells are needed on the south side of the former landfill to adequately evaluate potential releases.

It is important that that there be some active engagement in the review/comment/approval of their Work Plan by both agencies.

Thanks for considering this,
